

One Partner. Every Stage of Growth.

Forte Technologies is your Managed IT, cybersecurity, cloud, and compliance partner, built for where your business is going.

Technology only gets more complex as you grow. Systems multiply, security risks rise, and expectations expand. Forte Technologies orchestrates IT through every stage of growth, spotting what's missing today and anticipating what you'll need next.

The Scale of a Platform, a Team that **Knows Your Environment**

Forte Technologies pairs the scale and resources of a national provider with people who already know your industry and your environment. One partner for the services that matter most, whenever you need them.

Managed IT Services:

comprehensive infrastructure and technology management and support so you can focus on your business.

Managed Cybersecurity + Compliance:

managed detection and response, plus audit-ready support for frameworks like CMMC, ISO, PCI, and SOC 2.

Advisory Services:

virtual CISO and CIO guidance, security and compliance assessments, and IT strategy and roadmaps.

Private and Public Cloud Hosting:

secure, high-performance private and hosted cloud, including Azure and specialized workloads.

Backup and Disaster Recovery:

business continuity and disaster recovery that keeps your data protected and your operations running.

Email Security:

advanced protection against phishing, spoofing, and email-borne threats.

Expertise Across Highly-Regulated **Industries**

The Forte Technologies team encompasses thought leaders who are fluent in your industry and invested in your goals.

Healthcare

HIPAA-aligned IT and security for physician groups and care providers.

Financial Services

Compliant infrastructure for wealth managers and financial firms.

Defense Contractors

CMMC readiness for the defense supply chain.

Legal

Secure, reliable IT for firms handling sensitive client data.

Manufacturing

Resilient operations and security for connected production environments.

“

More expertise, more capability, more people who know their business, all while protecting the thing they value most: a partner who actually knows them. That's what Forte is built to be, and we're just getting started.

Bret Kidd CEO, Forte Technologies

”

Reduce Risk, Enhance Productivity, Support Growth

Our mission is to empower organizations by delivering proactive, secure, and reliable managed IT services that fit their needs. Forte Technologies meets you at each stage with three connected service tiers, each building on the last.

Forte Technologies Managed IT Tiers

Core

The table-stakes baseline. Day-to-day IT operations and foundational security, blending managed IT and managed security to keep your business running.

Secure

Built for growing organizations that need more sophistication and standardization across multiple locations.

Comply

For complex, regulated environments aligned to a compliance framework, with a dedicated virtual CISO (vCISO) assigned to your account to meet and maintain every required control.
